

ABSTRACT

Disclosed in the embodiments of the present disclosure are a display control method and apparatus, and a device and a storage medium. The method comprises: playing a first video in a first display area in a video stream playing interface of a preset application program; receiving a switching instruction, and when a preset reminding condition is met, switching to play a second video in the first display area, wherein the display area for the second video is changed from the first display area to a second display area during the playing process, and the size of the second display area is smaller than the size of the first display area; and displaying preset prompt information outside the second display area in the video stream playing interface.
