(54) Title: ENCODER, DECODER AND METHOD FOR ENCODING AND DECODING AUDIO CONTENT USING PARA-
METERS FOR ENHANCING A CONCEALMENT

FIG 1

(57) Abstract: The present invention concerns an encoder for coding speech-like content and/or general audio content, wherein the encoder is configured to embed, at least in some frames, parameters in a bitstream, which parameters enhance a concealment in case an original frame is lost, corrupted or delayed, and a decoder for decoding speech-like content and/or general audio content, wherein the decoder is configured to use parameters which are sent later in time to enhance a concealment in case an original frame is lost, corrupted or delayed, as well as a method for encoding and a method for decoding.
