(54) Title: **TRIPLE ZONE MASCARA BRUSH**

(57) Abstract

A mascara brush (10) having three sections (12, 14, 16) of differing bristles configuration is disclosed. The brush portion has a larger diameter middle section (14) comprised of a combination of soft (23) and stiff (22) bristles and two end sections (12, 16), each of which is comprised of at least one bristle-type which preferably become progressively shorter towards the ends of the brush portion. This improved brush configuration allows for optimal one stroke mascara application.
