(54) Title: NON-ORTHOGONAL CABLE MANAGEMENT SYSTEM

(57) Abstract: A cable management system (10) is provided having a patch panel (14) and a wire manager (16). The patch panel has a first connectivity interface (92) configured to connect with electronics cables. The wire manager is located proximate the patch panel and has a body with a curved interior contour. The wire manager is oriented in a non-orthogonal relation to the patch panel such that the body of the wire manager extends rearward at a nonorthogonal angle from the first connectivity interface. Wire managers may be mounted on opposite sides of the patch panel and oriented such that the wire managers and patch panels form a C-shape.
