(54) Title: BUBBLE DIVERTER FOR USE WITH DIVING EQUIPMENT

(57) Abstract: A diving helmet (10) bubble diverter comprises a front skirt portion (24) and a rear skirt portion (25) attached to the front skirt portion (24) at one end. The rear skirt portion (25) is configured for mounting onto the diving helmet breathing regulator assembly (12). The attached front and rear skirt portions (24, 25) form side pockets (46, 48) that divert exhaust air bubbles (40) away from the diver's mask when the rear skirt portion (25) is mounted onto the regulator assembly (12). The mounted rear skirt portion (25) forms a protective barrier between the exterior wall of the diving helmet (10) and the exhaust whisker (20) of the breathing regulator assembly (12) that prevents air bubbles (40) exiting the whisker (20) from coming into contact with the diving helmet (10) during diving activities.
