(54) Title: A CLIP

(57) Abstract: A clip (3) for retaining a cladding sheet (7) to an underlying structure is disclosed. A clip assembly which includes a strap (23) and a plurality of the clip (3) is also disclosed. The clip (3) includes a platform (17) and a pair of retaining member (19) which extend outwardly and downwardly from opposition sides of the platform (17). The length of the retaining member (19) is relatively short compared to the width of the platform (17). The clip assembly includes means for detachably locating each clip (3) to the strap (23). The clip assembly also includes means for locating a successive strap (23) in correct alignment in relation to an already positioned strap (23).
