(54) Title: SYSTEMS AND METHODS TO FACILITATE ELECTRONIC PAYMENT CONFIRMATION

FIG. 2

(57) Abstract: The present invention relates to a system and method to facilitate electronic payment confirmation by generating a second confirmation page (SCP) of a second service provider different from a first confirmation page (FCP) of a first service provider in a bridging transaction. In this method, a bridging system of a service provider provides the content of the SCP for a payer of the first service provider to generate the SCP. The generated SCP then may be presented to a receiver of the second service provider to the receiver's confirmation.
