BENZOXAZEPIN PI3K INHIBITOR COMPOUNDS AND METHODS OF USE

Abstract

The invention relates to benzoxazepin compounds of Formula I

I

including stereoisomers, geometric isomers, tautomers, or pharmaceutically acceptable salts thereof, wherein: Z^1 is CR^1 or N; Z^2 is CR^2 or N; Z^3 is CR^3 or N; Z^4 is CR^4 or N; and B is a pyrazolyl, imidazolyl, or triazolyl ring which compounds have anti-cancer activity, and more specifically, inhibit PI3 kinase activity.
