(54) Title: AIR FRESHENING APPARATUS

(57) Abstract: An air freshening apparatus comprises a reservoir with a wick, which reservoir can be filled with a fuel, particularly with lamp oil, and heat conducting means for heat transport from the wick, when burning, to a separate holder for an active component, such as a fragrance. The holder may form an integral part of the apparatus or may be replaceable, in which case the apparatus is provided with connecting means to connect the holder to the apparatus.
