

**MULTIPLE PLATE DOOR
ABSTRACT**

5 A multiple plate door, comprising: a door case; a door wing,
hingedly mounted in the door case; at least one protective wing, which
is connectable to the door wing; a bolt system, mounted on the
protective wing or on the door case, allowing to fasten the protective
wing on the door case; and several connecting systems, connecting the
protective wing with the door wing when the protective wing covers the
door wing, further allowing the protective wing to be separated from
10 the door wing.
