(54) Title: PROCESS FOR MAKING LIPOSOME PREPARATION

(57) Abstract

A process for making a liposome preparation comprised of liposomes that contain an encapsulated material is disclosed. The process comprises (A) providing a plurality of portions of a lipid or liposome formulation; (B) hydrating each of the plurality of portions with a solution comprising a material to be encapsulated; and (C) combining each of the plurality of portions to form a single liposome preparation. The liposome preparations can be used for drug delivery or as vaccines.
