

FULL-SHRINK LABELED CONTAINER AND TUBULAR SHRINK LABEL

ABSTRACT

5 A full-shrink labeled container has an opening sealed with a plug provided
with a pull-up part for unsealing, a body to which a shrink label having a heat
shrinkability is applied, and a neck having the circumference shorter than that of
the body. The shrink label covers the container from the lower end part to the
upper end part, also the pull-up part, and is formed with tear-off means capable of
10 exposing the pull-up part.
