
Integrate Task Activity Platform with Customer Process Platform
100
Separate Input Information contained in document into fields
110
Disassociate fields from context to form sub-fields
120
Mix sub-fields from at least two documents to remove context
130
Selectively distribute sub-fields to any one of a service provider platform, customer network platform or third party network platform
140
Receive response for performance of sub-fields
150
Compile responses
160
