

ABSTRACT

The purpose of the present invention is to allow one to set necessary slides or a group of slides with an order that cannot be changed when using certain presentation material.

Furthermore, the invention provides a system which allows such necessary slides or group of slides to be easily viewed when using such presentation material. Provided is a presentation management system 1 for managing a presentation, said system comprising a slide storage means 3 for storing a plurality of slides relating to the presentation and a group slide information appending means 11 for appending group slide information to a slide group of any two or more slides of the plurality of slides 5 stored in the slide storage means 3, said group slide information relating to the matter of the slide group being one group of slides 7 having a fixed display order, wherein the one group of slides 7 to which the group slide information is appended is placed in a state in which the display order cannot be changed and only a portion of the slides included in the one group of slides cannot be deleted.
