(54) **Title:** DETERMINING PROXIMITY TO A VENUE

FIG. 2

(57) **Abstract:** The description relates to mobile device location. One example can access stored survey data relating to a venue. The stored survey data can include internal data from inside the venue and external data from outside the venue. The example can obtain current sensing data at a location proximate to the venue. The example can determine whether the location is inside the venue or outside the venue by comparing the stored survey data and the current sensing data.
