

ATTACHMENTS FOR TRANSPORTING AND LAUNCHING MILITARY BRIDGES**ABSTRACT**

The subject of the invention is an attachment for transporting and launching military bridges (1) with light armored vehicles (2).

The attachment is comprised of a deck adapter (10) for removable attachment to the upper deck of the vehicle (2), and a front adapter (20) to be removably attached to the bow of the vehicle (2). The front adapter (20) consists of a framework matched to the bow of the vehicle (2) and to be removably attached to the bow. This consists of a launching beam, attached to the framework in a pivoting manner, with a motor-driven pinion for moving the bridge (1). In addition, a support foot is attached to the framework in a pivoting manner. Lifting cylinders are provided for raising and lowering the launching beam and the support foot.
