(54) Title: PATIENT INTERFACE

FIGURE 75

(57) Abstract: A nasal interface 2900 has an interface body 2910 with a nasal delivery element 2911. The nasal delivery element 2911 is configured to seal with a naris of a patient. The nasal interface has a gases inlet 2921 for delivery of respiratory gases into the nasal interface. The gases inlet 2921 and the nasal delivery element 2911 are in fluid communication with a gases flow channel 2925 of the interface body 2910 to deliver the respiratory gases from the gases inlet 2921 through the nasal delivery element 2911. The gases inlet 2921 has a portion 2921p that extends externally to the interface body 2910. The portion 2921p is in a fixed position that is offset from a midline plane MP bisecting the nasal interface 2900 and is obliquely angled relative to the midline plane MP to position an opening 2921o of the gases inlet away from the midline plane MP.
