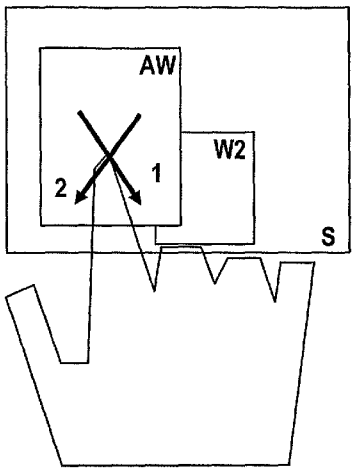
(54) **Title**: GESTURE ON TOUCH SENSITIVE INPUT DEVICES FOR CLOSING A WINDOW OR AN APPLICATION

Fig. 1



(57) **Abstract**: A method for closing an active window or an application on a user device via detection of a user input gesture on a touch sensitive input device of said user device comprises a step of detecting touch input data with respect to the touch sensitive input device, a step of interpreting said touch input data, such that, in case said touch input data is recognized as corresponding to a gesture of forming a X-shape on said touch sensitive input device with said touch sensitive input device being oriented in a normal reading position, the active window or running application will be closed. A user device on which said method is implemented is disclosed as well.
