(54) Title: A METHOD FOR RECOVERING A CATALYST FROM A REACTION EFFLUENT

(57) Abstract: The invention relates to a method for recovering a catalyst from an upgraded liquid bio-based material. The method comprises a step of providing a reaction effluent by means of a liquefaction reaction, the reaction effluent comprising at least oil product, the catalyst and coarse particles (liquefaction step), a step of separating coarse particles from the reaction effluent to provide a coarse-particle-depleted reaction effluent (coarse particles separation step), and a step of separating catalyst from the coarse-particle-depleted reaction effluent to provide a separated catalyst and a purified oil product (catalyst separation step).
