(54) Title: PUTRESCIBLE ORGANIC WASTE TREATMENT

(57) Abstract: A putrescible organic waste treatment system and method of treating the same comprising a comminution unit including comminution means adapted to substantially comminute putrescible organic waste into a pulp slurry, the comminution unit being adapted to be connected to a supply of water, and a control means adapted to control the flow rate and/or volume of water supplied to the comminution means. During comminution of a particular amount of putrescible organic waste, the control means controls the quantity of water supplied to the comminution means such that a waste pulp having a predetermined physical characteristic is produced.
