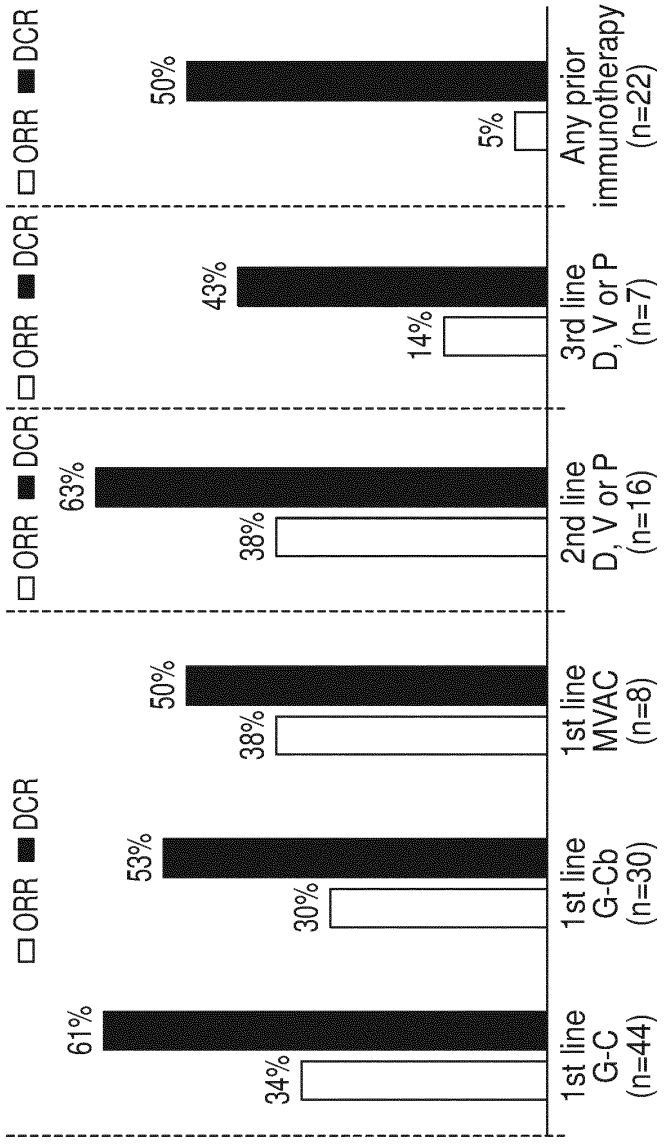

FIG. 1

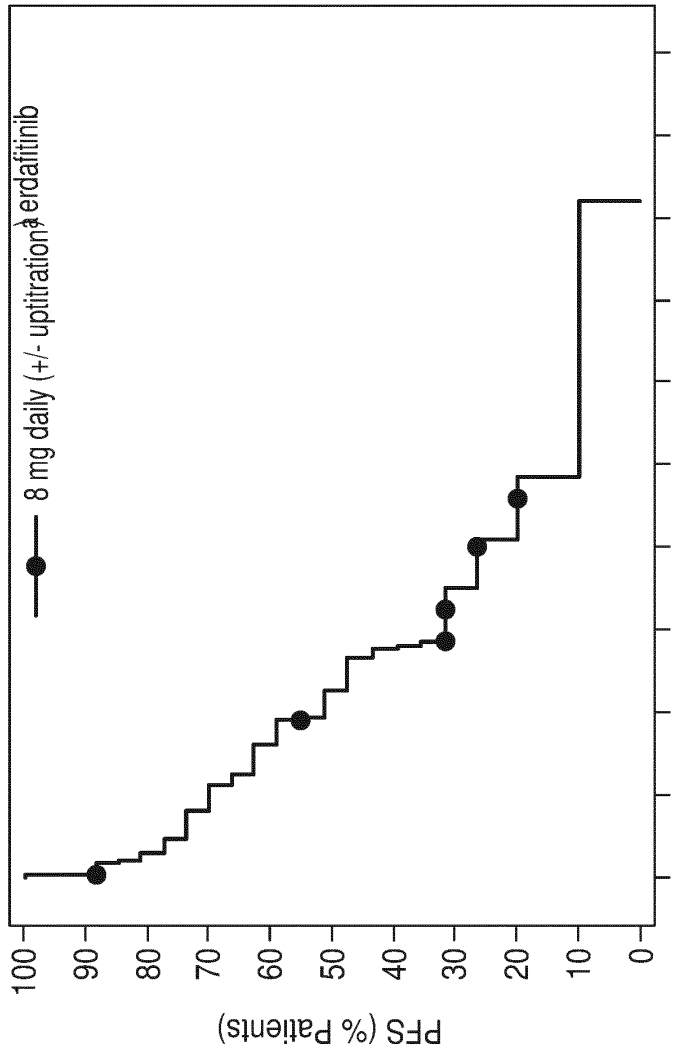

Figure 1: Response rates with prior systemic therapies

C, cisplatin; Cb, carboplatin; DCR, Disease control rate; D, V or P, docetaxel/vinflunine/paclitaxel; G, gemcitabine; MVAC, methotrexate/vinblastine/doxorubicin/cisplatin or methotrexate/vinblastine/epirubicin/cisplatin; ORR, objective response rate

FIG. 2

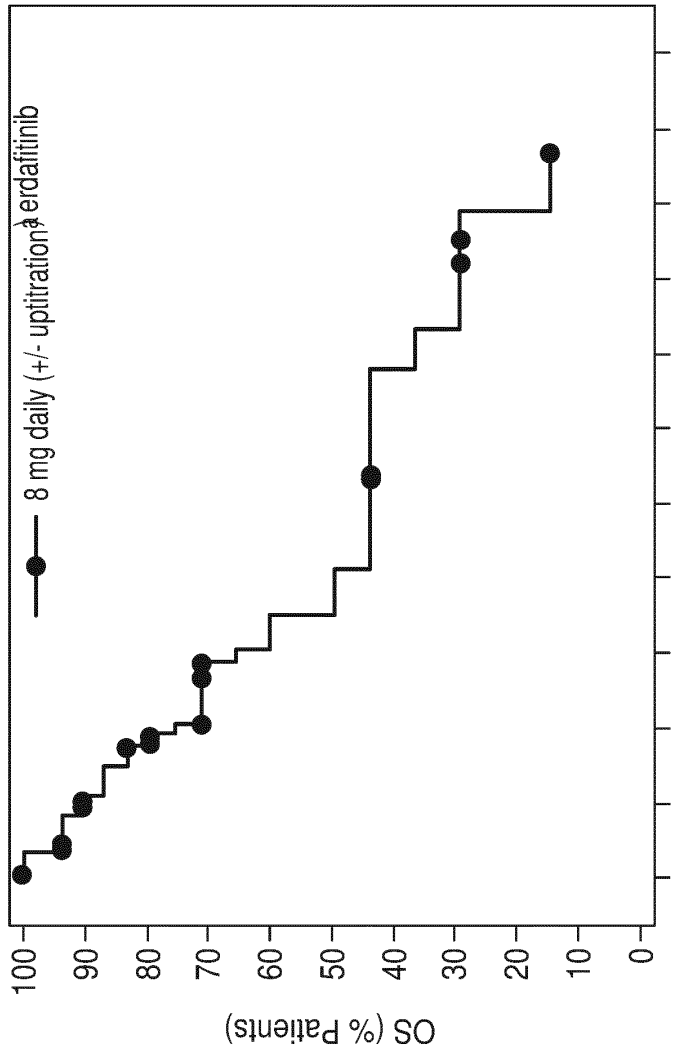

Figure 2: Kaplan-Meier plot of PFS following subsequent therapy to erdafitinib

[a]Patients whose serum phosphate was <5.5 mg/dL on day 14 of cycle 1 and had no erdafitinib-related toxicity were uptitrated to 9 mg daily.
PFS, progression-free survival

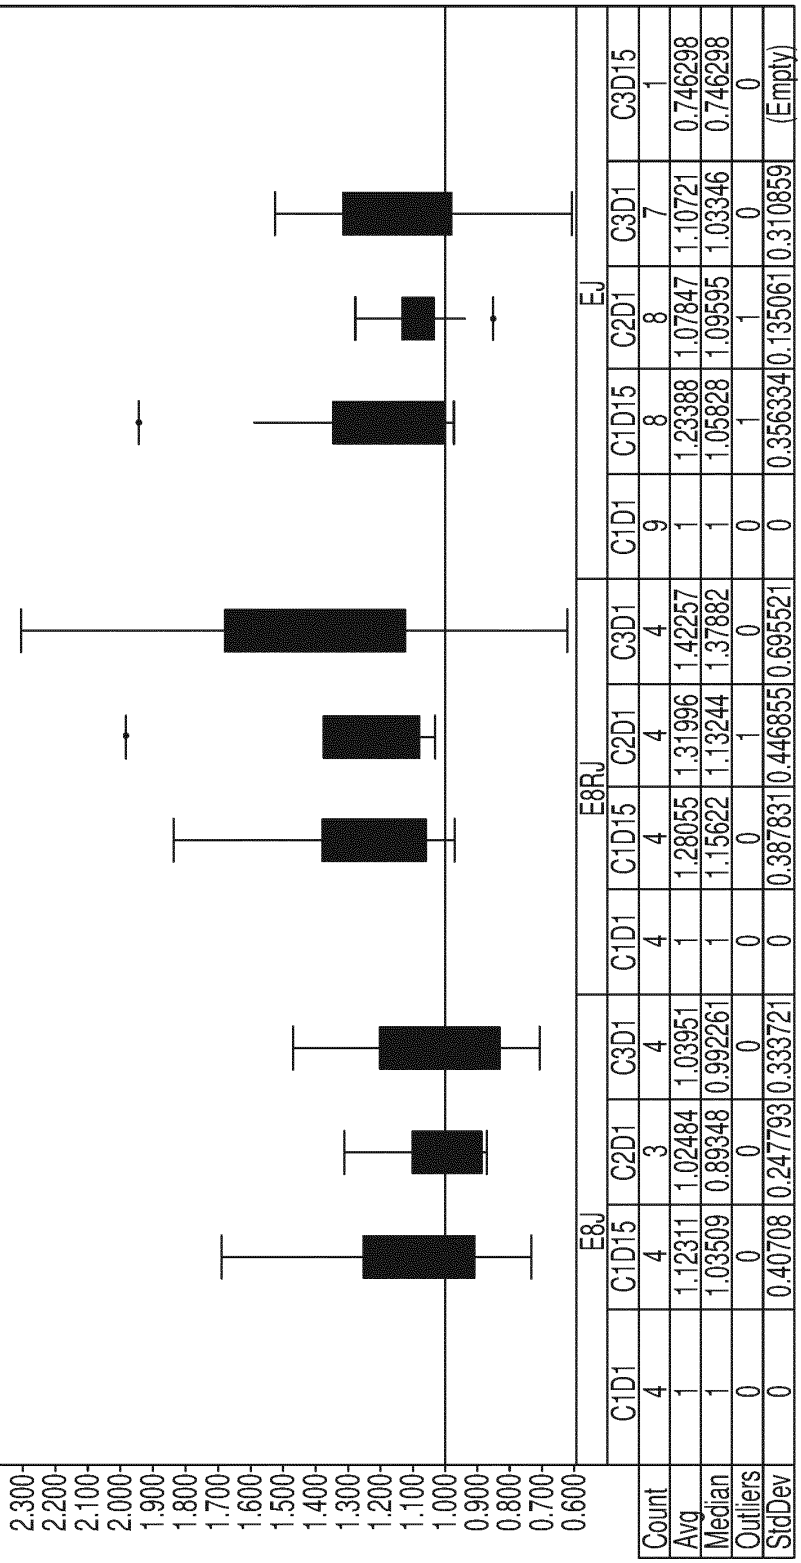

FIG. 3

Figure 3: Kaplan-Meier plot of OS following subsequent therapy to erdafitinib

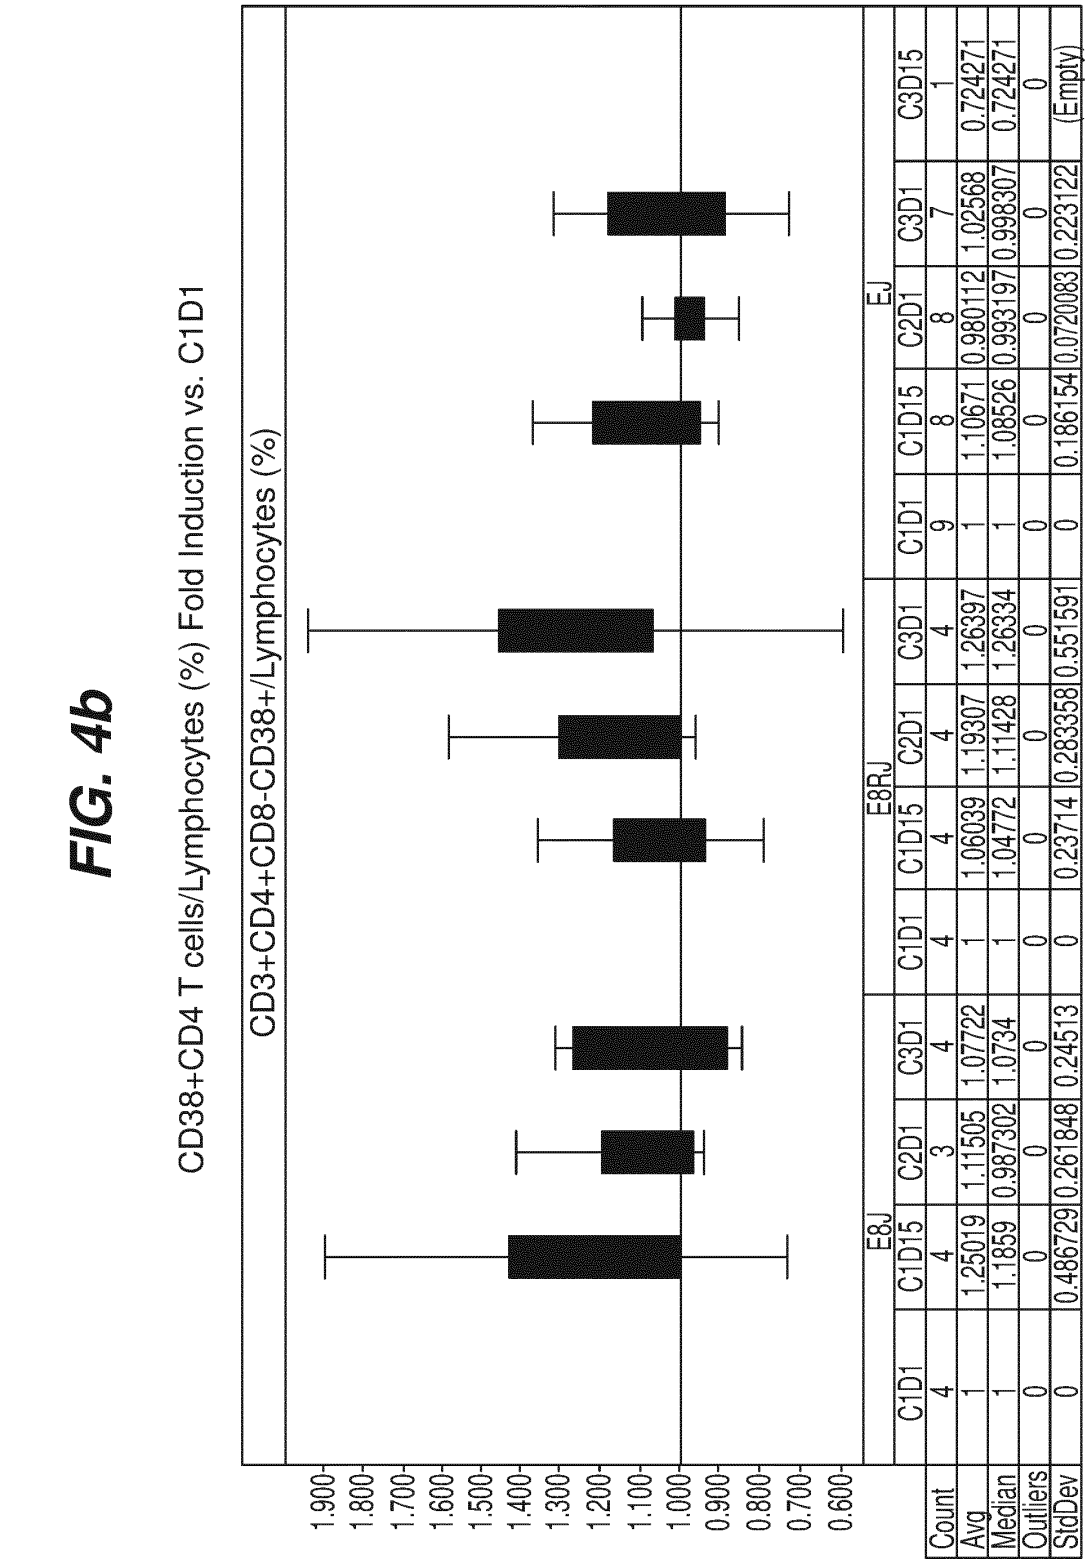

[a]Patients whose serum phosphate was <5.5 mg/dL on day 14 of cycle 1 and had no erdafitinib-related toxicity were uptitrated to 9 mg daily.
OS, overall survival
