(54) Title: SYSTEM AND METHOD FOR DETERMINING THE LOCATION OF PERSONS

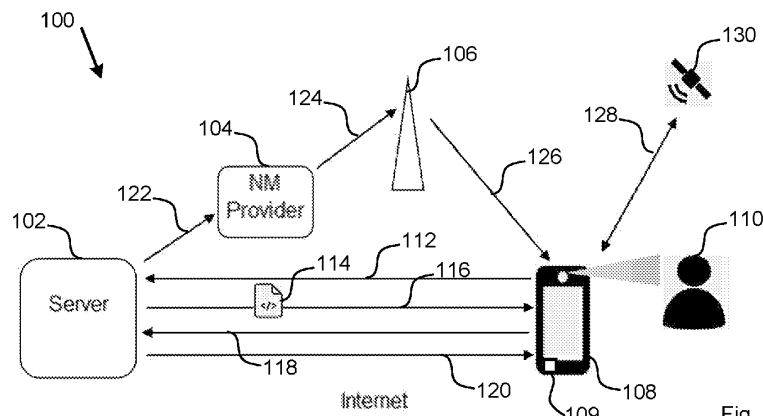

Fig. 1

(57) Abstract: There is provided a method for determining whether a person is located within an acceptable locality, the person being associated with a mobile communication device. The method comprises sending a first location confirmation message to the mobile communication device over a communication means, the location confirmation message comprising a reference to location confirmation code, receiving a request from the mobile communication device to access the location confirmation code, and sending, to the mobile communication device, the location confirmation code. The method further comprises receiving, from the mobile communication device, location data indicative of a location of the mobile communication device, and determining, based on the location data, whether the location of the mobile communication device is within the acceptable locality.
