- (54) Title:** THIN FILM PROCESSING APPARATUSES FOR ADJUSTABLE VOLUME ACCOMMODATION

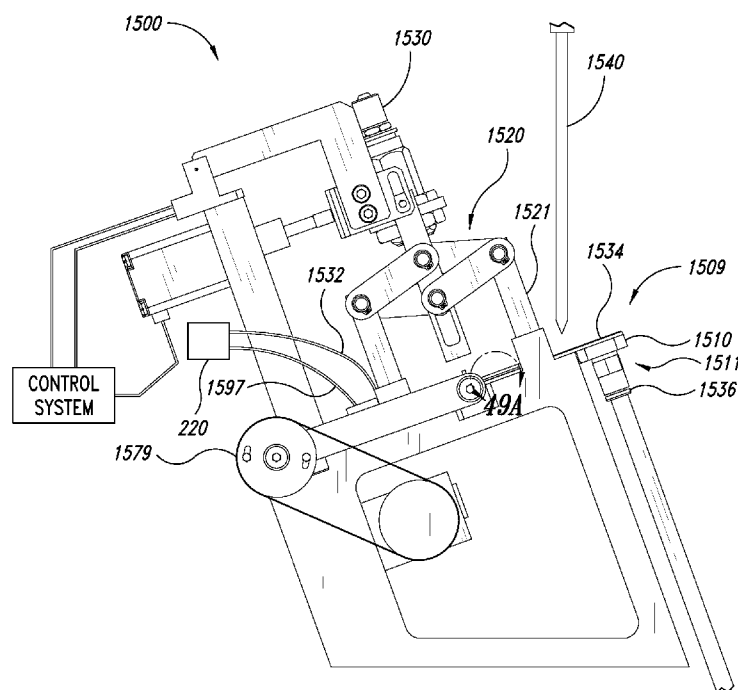

FIG. 49

- (57) Abstract:** An apparatus can be used to apply and remove fluid substances for processing biological samples. The fluid substances can be delivered between a first substrate and a second substrate. One substrate carries a specimen. A layer of the fluid substance is retained in a gap defined by the first and second substrates. One substrate is moved with respect to the second substrate to disperse the fluid substance in the gap.
