(54) Title: NEAR REAL-TIME MESSAGING SERVICE FOR DATA CENTER INFRASTRUCTURE MONITORING DATA

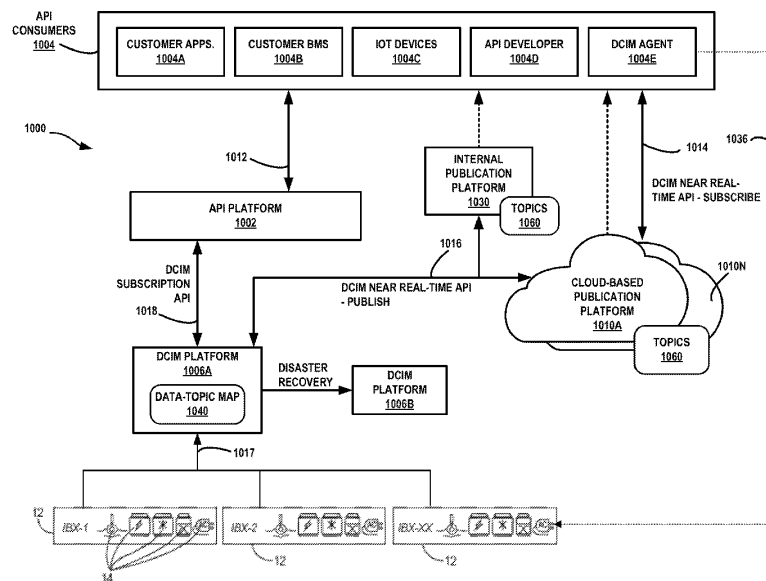

FIG. 16

(57) Abstract: In some examples, a method includes receiving, by a data center infrastructure monitoring system (1006), a registration request that indicates a method of a subscription application programming interface (1014) and specifies one or more event subjects of events describing a system operation of a data center (12); storing, by the data center infrastructure monitoring system (1006) to a data-topic map (1040), respective mappings for the one or more event subjects to a topic (1060) of a cloud-based publication platform (1010A); monitoring, by a data center infrastructure monitoring system (1006), a plurality of physical infrastructure assets (14) that enable system operation within the data center (12) to obtain an event that describes one of the event subjects; and publishing, by the data center infrastructure monitoring system (1006), the event to the topic (1060).
