

ABSTRACT (FIG. 1)

"ELEVATOR SYSTEM AND DISPLAY DEVICE"

According to one embodiment, an elevator system
selects a suitable car for a passenger from among a
5 plurality of cars on the basis of a destination floor
of the passenger, and causes the selected car to
respond. The elevator system includes a group
management controller (30), standalone control devices
(40A-40C), a destination floor registration apparatus
10 (11) and a car assignment controller (50).
