ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.*

(54) Title: POLYACETAL RESIN COMPOSITION AND FRAGRANCE-EMITTING SHAPED ARTICLE

(57) Abstract: The invention provides fragrance-emitting shaped articles such as slide fasteners which retain the various character-
istics inherent to polyacetal resins. Shaped articles such as the row of engaging teeth, top end stop and bottom end top or separable
end stop assembly for a slide fastener are manufactured from a resin composition comprising a polyacetal resin and a fragrance ma-
terial having an aldehyde group-free chemical structure and a boiling point which is at least as high as the polyacetal resin processing
temperature.
