(54) Title: IMPROVEMENTS IN FUELS

(57) Abstract: There is provided a method of providing an improved biofuel, by the presence of an additive which is the reaction product of (i) a compound containing the segment -NR¹R² where R¹ represents a group containing from 4 to 44 carbon atoms and R² represents a hydrogen atom or a group R¹ (for example di-hydrogenated tallow amine) and (ii) a carboxylic acid having from 1 to 4 carboxylic acid groups or an acid anhydride or acid chloride thereof (for example phthalic acid or phthalic anhydride). The additives described combat problems arising from precipitation at temperatures above the cloud point.
