BB Access network device
CC Step 21, send, to a first-type terminal, physical downlink control channel (PDCCH) common configuration information which is configured for an initial bandwidth part (BWP), wherein the downlink control channel common configuration information is used for indicating a predetermined resource for the first-type terminal to execute a predetermined operation, and the predetermined resource comprises at least one of the following: an additional common control resource set CORESET, an additional common search space, a common control resource set CORESET0 and a common search space 0

(57) Abstract: Provided in the embodiments of the present disclosure is a resource configuration method. The method is executed by an access network device. The method comprises: sending, to a first-type terminal, downlink control channel common configuration information which is configured for an initial bandwidth part (BWP), wherein the downlink control channel common configuration information is used for indicating a predetermined resource for the first-type terminal to execute a predetermined operation, and the predetermined resource comprises at least one of the following: an additional common control resource set CORESET, an additional

common search space, a common control resource set CORESET0 and a common search space 0.

(57) 摘要: 本公开实施例提供了一种资源配置的方法, 其中, 该方法由接入网设备执行, 该方法包括: 向第一类型终端发送针对初始带宽部分BWP配置的下行控制信道公共配置信息; 其中, 下行控制信道公共配置信息用于指示第一类型终端执行预定操作的预定资源; 预定资源包括以下至少之一: 附加的公共控制资源集CORESET; 附加的公共搜索空间; 公共控制资源集CORESET0; 以及公共搜索空间0。
