(54) Title: COMPOSITIONS AND METHODS FOR TREATING NEUROLOGICAL DISORDERS

(57) Abstract: Compositions useful for treating neurological disorders including neurodegenerative disorders associated with deleterious protein aggregation, aberrant protein folding, such as brain amylogenic diseases, and/or neurodegenerative autoimmune disorders are described. Methods of using said compositions also are described. In particular, methods to treat a neurodegenerative disorder such as Alzheimer's disease and a neurodegenerative autoimmune disorder such as Multiple Sclerosis are contemplated utilizing proteosomes and/or Glatiramer Acetate, wherein the GA is in a submicron emulsion or a nanoemulsion.
