

ABSTRACT**COSMETIC METHOD AND COMPOSITION BASED ON SHORT-CHAIN
FRUCTOOLIGOSACCHARIDES AND A NATIVE STARCH**

The present invention relates to a cosmetic method for balancing the skin microbiota, comprising the application of at least one short-chain fructo-oligosaccharide and at least one native starch. The present invention also relates to a cosmetic composition comprising, in a cosmetically acceptable carrier, at least one short-chain fructo-oligosaccharide and at least one native starch.
