

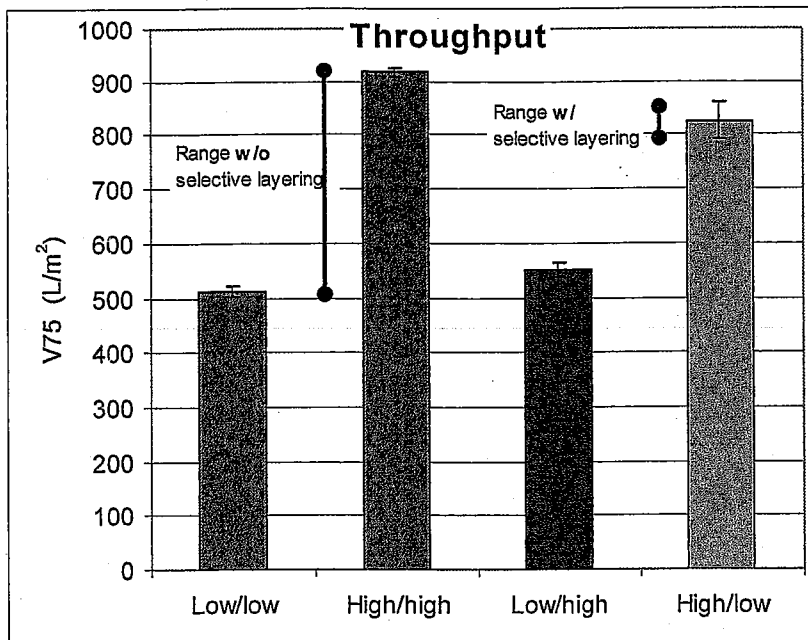

FIG 1

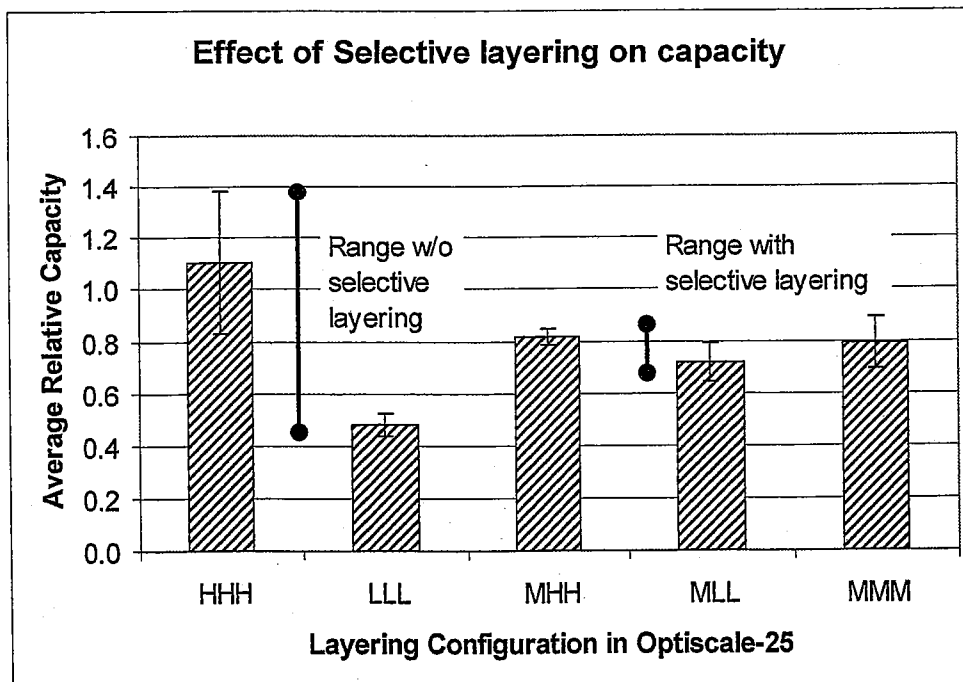

FIG. 1a.

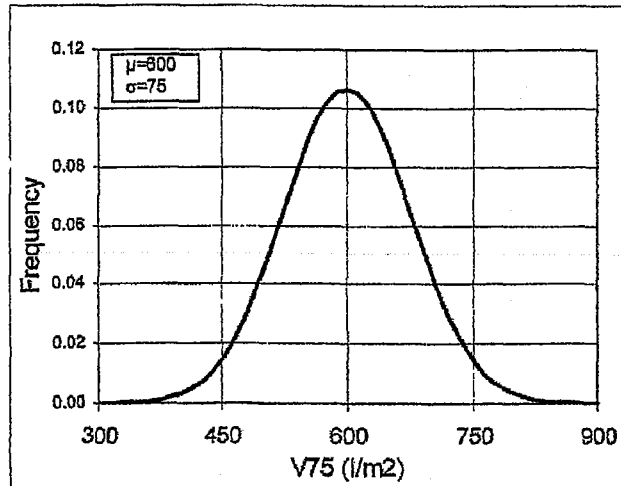

Figure 2. Hypothetical distribution of membrane capacities. V75 is the volume processed by the membrane at 75% flow decay.

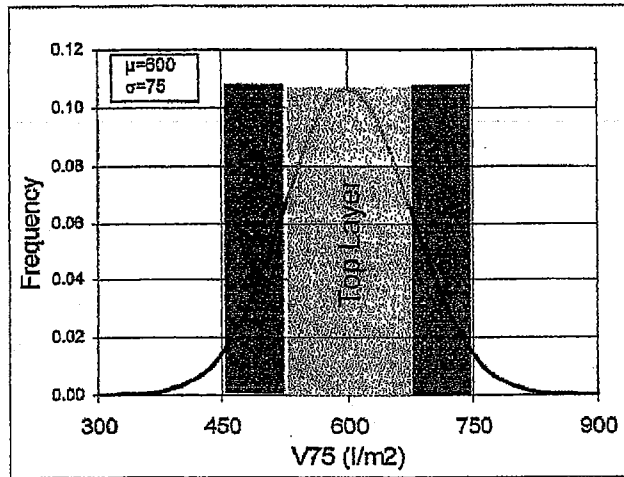

Figure 3. Strategy "A" for membrane layering.

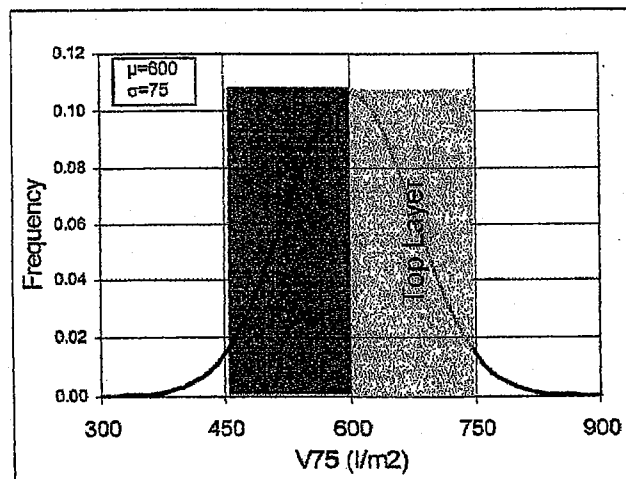

Figure 4. Strategy "B" for membrane layering.

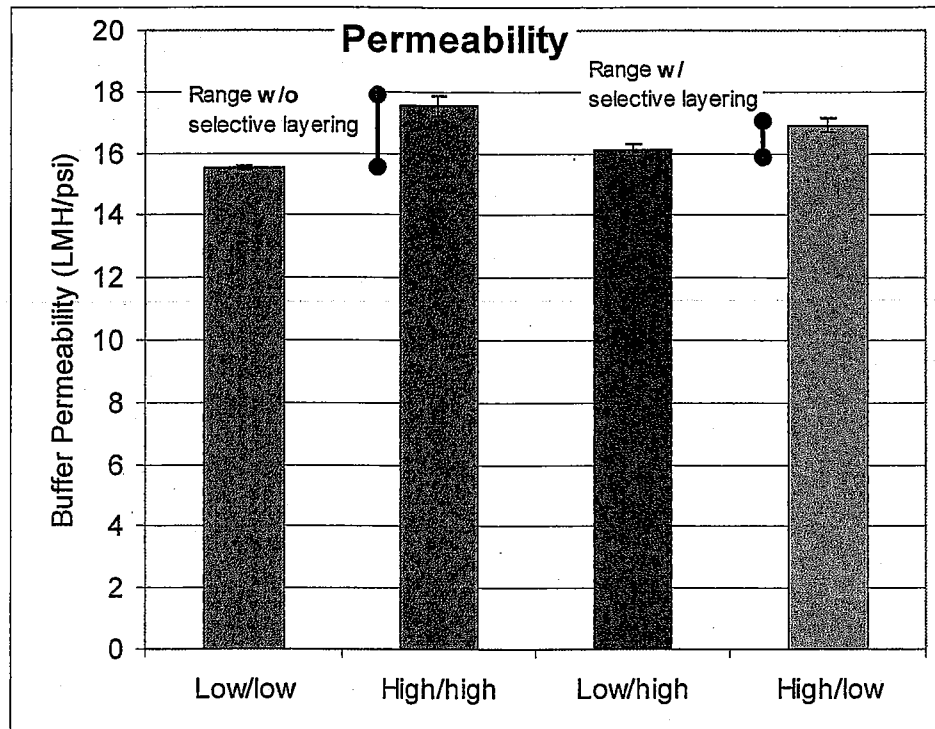

FIG. 5

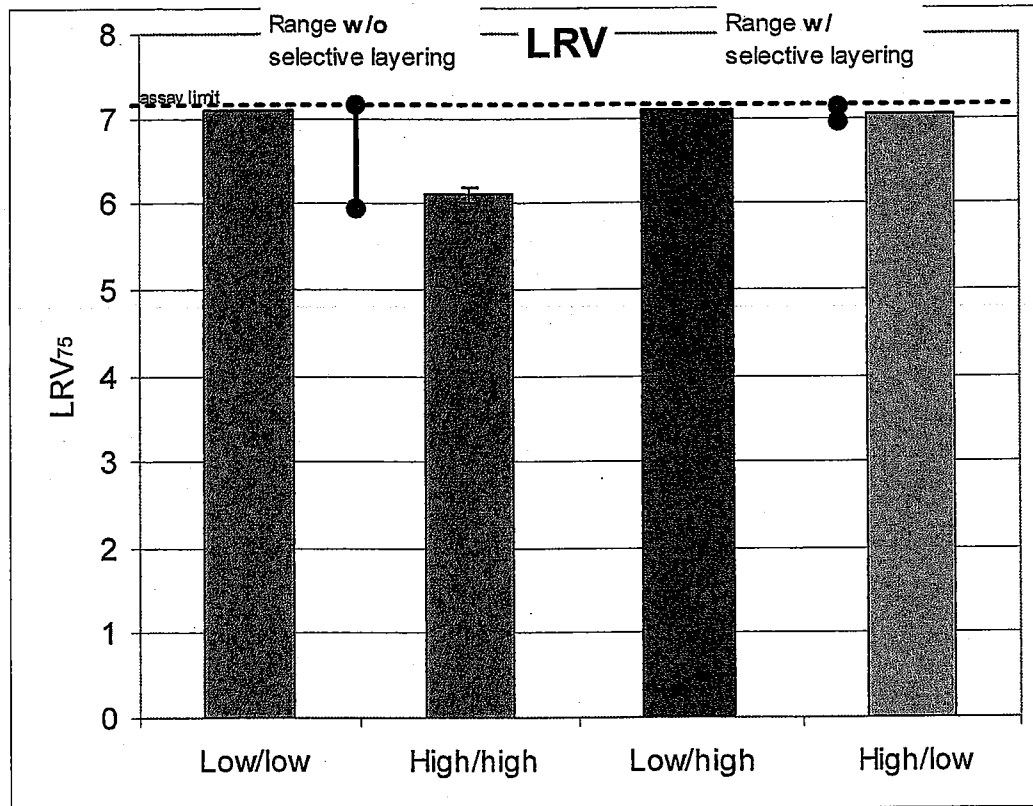

FIG. 6

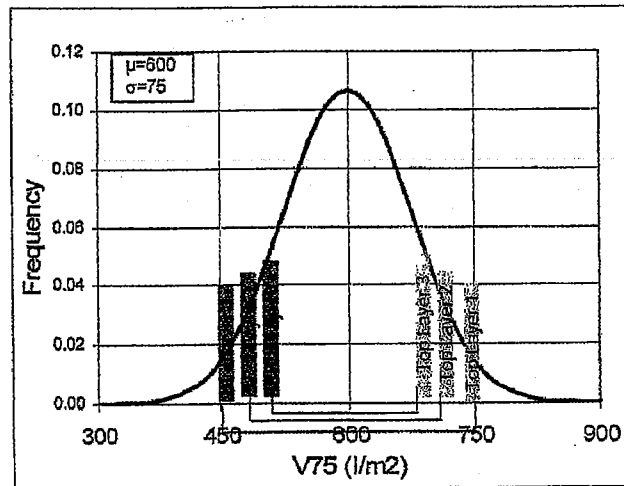

Figure 7. Strategy "C" for membrane layering.

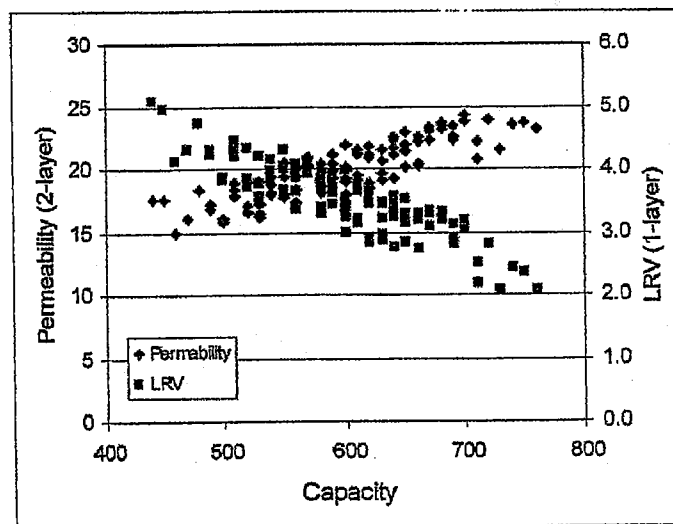

Figure 8. Hypothetical capacity, permeability, and LRV distributions and correlations.
