COMMUNICATION APPARATUSES AND COMMUNICATION METHODS FOR MULTI-PRACH TRANSMISSIONS WITH LIMITED BANDWIDTH

ABSTRACT

The present disclosure provides communication apparatuses and communication methods for multi-PRACH transmissions with limited bandwidth. The communication apparatuses include a communication apparatus comprising: circuitry which, in operation, determines a first uplink (UL) band associated with the communication apparatus, the first UL band being narrower than a second UL band; and a transmitter, which in operation, transmits a multi-PRACH transmission in the first UL band.
