

**ABSTRACT:**

The present invention relates to a mouth freshener and the said mouth freshener is fully consumable product and process that is free from use of tobacco leaves as such but releases sufficient amount of nicotine to a consumer to pull a person out of nicotine craving symptoms and gives the same satisfaction to the consumers as a regular tobacco or gutkha eater or an active smoker hunts for. The product under the subject invention named as “niconuts” comprises the use nuts, alkalisers (alkalisers), Humectants (humidity maintainers), taste enhancers, sweeteners and the nicotine compound as the composition contributors. Compounding of the nuts with nicotine compound mix results into the nicotine content in the range of 0.001-4%
