(54) Title: RADIO COMMUNICATION DEVICES, ACCESS POINTS, METHOD FOR CONTROLLING A RADIO COMMUNICATION DEVICE, AND METHODS FOR CONTROLLING AN ACCESS POINT

FIG 1B

(57) Abstract: According to various embodiments, a radio communication device may be provided. The radio communication device may include: a transmitter configured to transmit a null data packet. The null data packet may include acknowledgement data indicating acknowledgements for a plurality of packets. The null data packet may include a cyclic redundancy check field configured to provide information based on which the null data packet or acknowledgements may be checked for errors. The null data packet may include further information based on which the acknowledgements may be checked for errors.
