CLAIMS

[Claim 1]

A sunscreen composition comprising

two or more oil-soluble ultraviolet absorbers,

composite silicone particles having an average particle diameter of 10 μm or less, and

at least one electrolyte, which is at least one member selected from the group consisting of adenosine phosphate, ascorbic acid, ascorbic acid derivatives, salts thereof, sodium chloride, magnesium chloride and calcium chloride, wherein

the sunscreen composition is free of an ultraviolet scattering agent,

the electrolyte is contained in an amount of 0.5 wt.% or more in the sunscreen composition,

the sunscreen composition is in the form of a water-in-oil type (W/O) emulsion, and

the ascorbic acid derivatives are selected from the group consisting of magnesium ascorbyl phosphate, sodium ascorbyl phosphate, disodium ascorbyl sulfate, glucoside ascorbate, glucosamine ascorbate and dehydroascorbic acid.

[Claim 2]

The sunscreen composition according to claim 1, wherein the electrolyte is at least one member selected from the group consisting of adenosine monophosphate and salts thereof.

[Claim 3]

The sunscreen composition according to claim 1 or 2, wherein 10 to 40 wt.% of water is contained in the sunscreen composition.

[Claim 4]

The sunscreen composition according to any one of claims 1 to 3, wherein the oil-soluble ultraviolet absorbers are at least two members selected from the group consisting of ethylhexyl methoxycinnamate, octocrylene, diethylamino hydroxybenzoyl hexyl benzoate, polysilicone-based ultraviolet absorbers, homosalate, t-butyl methoxybenzoyl methane, ethylhexyl salicylate, ethylhexyl triazone, bis-ethylhexyloxyphenol methoxyphenyl triazine, methylene-bis-benzotriazolyl tetramethylbutylphenol, oxybenzone-3, and drometrizole trisiloxane.

[Claim 5]

The sunscreen composition according to any one of claims 1 to 4, wherein the oil-soluble ultraviolet absorbers are at least two members selected from the group consisting of ethylhexyl methoxycinnamate, octocrylene, diethylamino hydroxybenzoyl hexyl benzoate, and polysilicone-15.

[Claim 6]

The sunscreen composition according to any one of claims 1 to 5, wherein the composite silicone particles are composite silicone particles in which silicone rubber is coated with a silicone resin.

[Claim 7]

The sunscreen composition according to claim 6, wherein the composite silicone particles are composite silicone particles in which spherical silicone rubber is coated with a silicone resin.

[Claim 8]

The sunscreen composition according to any one of claims 1 to 7, wherein the oil-soluble ultraviolet absorbers are contained in a total amount of 10 wt.% or more.

[Claim 9]

The sunscreen composition according to any one of claims 1 to 8, wherein the oil-soluble ultraviolet absorbers are contained in a total amount of 10 to 25 wt.%, the composite silicone particles are contained in an amount of 4 to 20 wt.%, and the electrolyte is contained in an amount of 0.5 to 10 wt.%.
