

[도3]

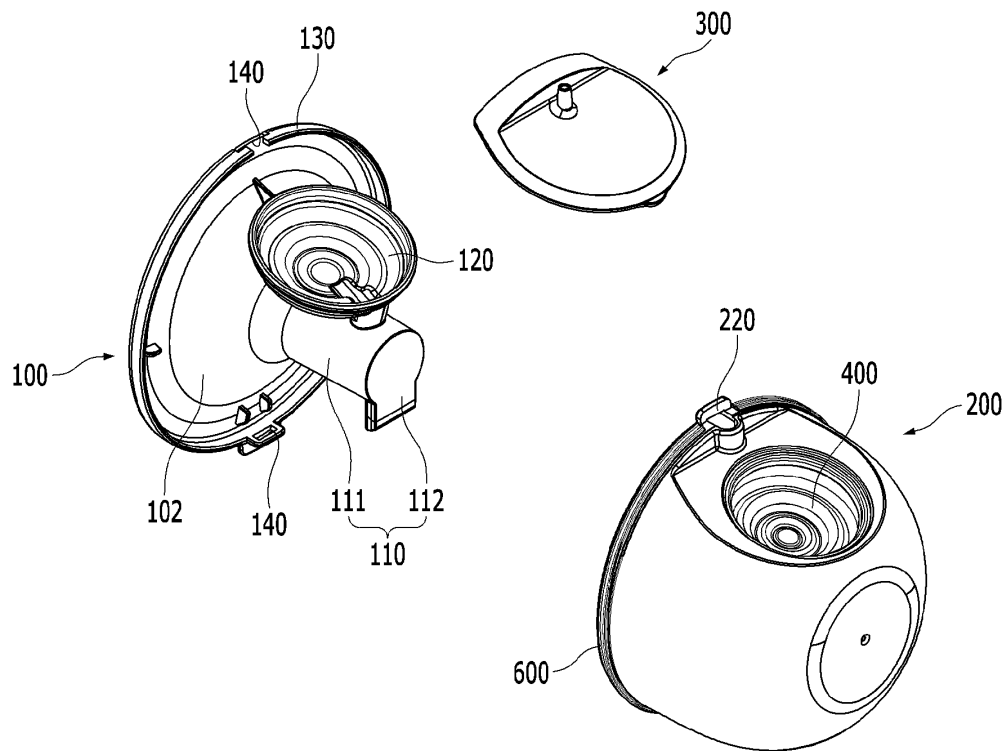

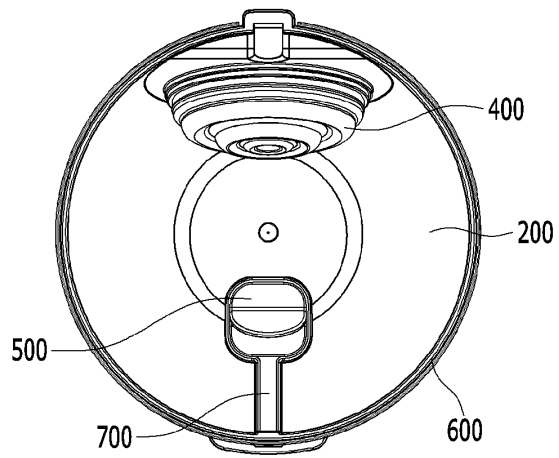

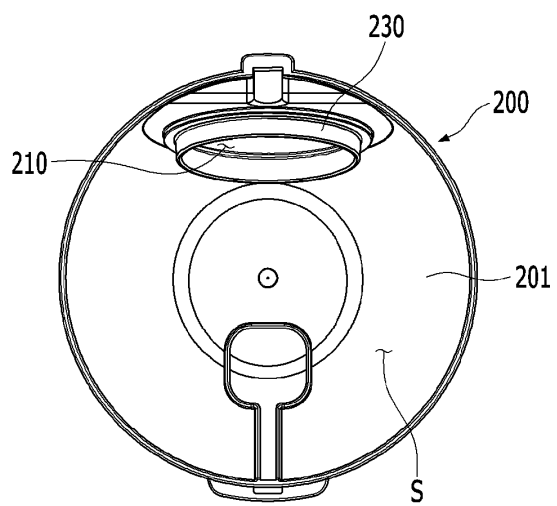

Figure 1 is a cross-sectional view of a first embodiment of a medical device. The device consists of a main body (521) and a distal end (511). The main body (521) has a curved, flexible section (522) that is shown in a bent position. The distal end (511) also has a curved, flexible section (512). A label G1 points to a specific region of the device.
