(54) Title: WELLHEAD ASSEMBLY

(57) Abstract: An assembly for use on a wellhead comprises a tree body (10, 106) having an internal main bore (18, 126) arranged in use to be aligned with the bore of a wellhead housing (6, 204); the tree body comprising a lateral bore (20,128) extending through the tree body from the internal bore; the tree body further comprising means for connecting to a connector (38, 108) so as to align the internal bore of the tree body with an internal bore in the connector, in use the tree body and the connector together forming a horizontal tree. The tree body may comprise one or more integrally formed bores and valves to provide fluid flow-paths for the annulus and/or cross-over functions. A cross-over bore (210) may extend laterally through the tree body. A wellhead assembly comprising the tree assembly is also provided.
