(54) Title: POLYURETHANE-BASED WATERPROOFING COMPOSITION FOR THE WATER-PROOFING OF CONCRETE STRUCTURES

(57) Abstract: The present invention relates to waterproofing compositions based on polyurethanes, which are particularly useful for the waterproofing of concrete structures. The compositions are characterized in that they comprise at least one branched isocyanate component comprising on average at least 2.3 isocyanate groups per molecule and at least one hydroxycarboxylic acid component. Preferably the composition further comprises at least one polyol component and at least one latent amine component.
