

## CONTROL METHOD FOR INFORMATION APPARATUS AND PROGRAM

When selection of a device icon representing one target device among one or more target devices is sensed in a region corresponding to one room included in a floor plan, a control screen for operating, or confirming a state of, the one target device corresponding to the sensed device icon is displayed on a display as overlapped on a display screen representing the floor plan, and device icons representing the target devices installed in the one room are moved out of a display region of the control screen.
