(54) Title: ANATOMICALLY MATCHED PATIENT ALIGNMENT BLOCKS

Fig. 3

(57) Abstract: The present invention relates to systems and methods for design and manufacturing anatomically matched patient alignment blocks (100, 1000) for referencing and aligning during an arthroplasty procedure. More specifically, the present invention relates to improved anatomically matched patient alignment blocks for use in arthroplasty procedure, a novel system for design and manufacturing of these blocks based upon patient's anatomy. The present invention also relates to the method of positioning the improved anatomically matched patient alignment blocks during arthroplasty procedure.
