organic EL display panel disclosed in Patent Literature 1.

Description of Embodiments

The following description will discuss embodiments of the present invention in detail.

The following description will discuss the present embodiment with reference to Figs. 1 through 8.

In the present embodiment, an organic EL display device will be described as an example of an EL (electroluminescence) display device of the present embodiment.

<Schematic configuration of organic EL display device>

Fig. 2 is a cross-sectional view schematically illustrating a configuration of main parts of an organic EL display device 100 in accordance with the present embodiment.

As illustrated in Fig. 2, the organic EL display device 100 includes a pixel section 101 and a circuit section 102.

The pixel section 101 is made up of an organic EL display panel 1. The circuit section 102 is made up of members such as a circuit substrate or an IC (Integrated Circuits) chip on which a driving circuit for driving the

organic EL display panel disclosed in Patent Literature 1.

Description of Embodiments

The following description will discuss embodiments of the present invention in detail.

[Embodiment 1]

The following description will discuss the present embodiment with reference to Figs. 1 through 8.

In the present embodiment, an organic EL display device will be described as an example of an EL (electroluminescence) display device of the present embodiment.

<Schematic configuration of organic EL display device>

Fig. 2 is a cross-sectional view schematically illustrating a configuration of main parts of an organic EL display device 100 in accordance with the present embodiment.

As illustrated in Fig. 2, the organic EL display device 100 includes a pixel section 101 and a circuit section 102.

The pixel section 101 is made up of an organic EL display panel 1. The circuit section 102 is made up of members such as a circuit substrate or an IC (Integrated Circuits) chip on which a driving circuit for driving the
