

ABSTRACT

NETWORK WEBSITE SYSTEM FOR ASSISTING A VENDEE TO DESIGN A GIFT

The present invention provides a network website system for assisting a vendee to design a gift. The network website system classifies and stores the merchandise data provided by vendor members in a predetermined way. When a vendee enters the network website system, he or she may choose not only to be assisted in selecting the merchandise, but also to design the merchandise provided by vendor members in order to make the merchandise have distinguishing features. It allows buyers to save the purchasing time and cost when using this network website system.
