

## ABSTRACT

A flexographic printing plate includes a raised part (2) for transferring a printing substance to a printing substrate, the raised part (2) having a top surface and a side, the top surface and the side forming an angle of not less than  $90^\circ$  and not more than  $105^\circ$ .

- 5 More preferably, the top surface and the side form an angle of not less than  $95^\circ$  and not more than  $100^\circ$ . A flexographic printer includes a flexographic printing plate as described above.
