

TITLE OF INVENTION: DEFORMABLE CUSHION WITH MASSAGE FUNCTION

ABSTRACT

There is provided a massage function-equipped deformable cushion that allows a user to receive massage in a comfortable position such as a position reclining on a body pillow.

The massage function-equipped deformable cushion comprises a cushion body (3), in which free-flowing content is enclosed, configured to deform into a shape conforming to a figure or posture of a user (M), and a massage mechanism (4), mounted to the cushion body (3), for giving the user (M) massage. Preferably, the cushion body (3) includes a bag body (2) that can be loaded with the content, and the content is enclosed in the bag body (2) in an amount that leaves a space part inside the bag body (2).
