

ABSTRACT

5 A pressure sensitive adhesive sheet (15) includes a transparent base film (59), a
first pressure sensitive adhesive layer (51) disposed on one surface of the transparent base
film, and a second pressure sensitive adhesive layer (53) disposed on the other surface of
the transparent base film. A thickness of the first pressure sensitive adhesive layer is
larger than a thickness of the second pressure sensitive adhesive layer. In formation of an
10 image display device, the first pressure sensitive adhesive layer is arranged in contact
with a front transparent plate, and the second pressure sensitive adhesive sheet is
arranged in contact with an image display panel.
