

ABSTRACT**A SYSTEM AND METHOD FOR PERFORMING CROSS-BORDER
SHAREHOLDER ELECTRONIC VOTING**

5

A method and system for performing cross-border shareholder electronic voting, the system comprising at least one first server connected to a plurality of domestic custodians and an overseas international voting agency, wherein an English agenda of the shareholders' meeting is provided to the overseas international voting agency through the at least one first server; the at least one first server receives selected options in the agenda from the overseas customers owning the first stock via the overseas international voting agency; and the at least one first server communicates with a shareholder electronic voting platform to complete the shareholder's electronic voting in accordance with the selected options in the English agenda.
