(54) Title: RAZOR CARTRIDGE FOR A LIQUID DISPENSING RAZOR

(57) Abstract: The invention features a razor (100) for dispensing a fluid during shaving. The razor includes a handle (200) and a razor cartridge (300) removably attached to the handle. The razor cartridge includes a housing (302) having a front surface (308) and a rear surface (310) and an aperture (316) that extends from the rear surface to the front surface. A cartridge connecting structure (312) is attached to the rear surface of the housing and includes a fluid dispensing member (318) disposed therein. The fluid dispensing member includes a converging flowpath (320a, 320b) that is in fluid communication with the aperture in the housing.
