WHAT IS CLAIMED IS:

1. Use of an ophthalmological composition in the manufacture of a medicament for the treatment of allergies, wherein said ophthalmological composition comprises from 0.005% to 0.050% w/v brimonidine and from 0.01% to 1% w/v of ketotifen, wherein w/v denotes weight by total volume of the composition.

2. The use of claim 1, wherein the ketotifen is at a concentration from 0.025% to 0.7% w/v.

3. The use of claim 1, wherein the ophthalmological composition further comprises a nonionic surfactant, hydroxypropylmethyl cellulose, a buffer and optionally, sorbate.

4. Use of a composition comprising from 0.005% to 0.050% w/v brimonidine and from 0.01% to 1% w/v of ketotifen, wherein w/v denotes weight by total volume of the composition, in the manufacture of a medicament for treating or preventing an allergic response in a subject in need thereof.

5. A composition for the treatment of allergic conjunctivitis comprising:

0.0035% w/v ketotifen fumarate;

0.035% w/v brimonidine;

2.5% w/v polysorbate;

from 0.1% to 1.2% w/v hydroxypropylmethyl cellulose;

4 millimolar citrate buffer; and

optionally, 0.1% w/v sorbate,

wherein the composition has a pH of 6.5.
