(54) Title: PROGRAMMABLE POWER CONVERTER

(57) Abstract: A power converter (10) adapted for receiving an AC input signal and a DC input signal and responsive thereto for providing a converted DC signal in which the converted DC signal has electrical characteristics which are selectable. The converter includes a programming circuitry (726) having a programmable memory (715) for storing a selection code, the programming circuitry (726) is cooperable for establishing the electrical characteristics of the converted DC signal based on the selection code.
