(54) Title: POOL DIVIDER DEVICE

FIG. 1

(57) Abstract: A pool divider device (1) for dividing at least one lane (20) of a swimming pool (2) into two shorter lanes (21, 22), comprising: a main structure (10) transversely arranged with respect to the at least one lane (20), configured to have a distance (H) from a water level (L) of the swimming pool (2) to allow a swimmer to pass below the main structure (10); and a lane divider device (11) connected to the main structure (10), comprising a dividing panel (110) and configured to move between an extended position (A), in which the dividing panel (110) is inserted into the lane (20) such that said lane (20) is divided into two shorter lanes (21, 22), and a retracted position (B), in which the dividing panel (110) is retracted towards the main structure (10) allowing a swimmer to pass below the main structure (10) and the panel (110).
